EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	*Astronomy; Elementary Education; *Energy; Hands on Science; Heat; Light; *Science Activities; Science and Society; Science Instruction; Scientific Concepts; Solar System; *Space Sciences; *Stars; Videotape Recordings
IDENTIFIERS	Sun

ABSTRACT

This 23-minute videotape features information, for children in grades K-4, about stars including their composition, brightness, and location. How stars are formed, why they seem to move across our sky, and how humans have used their patterns to form the constellations are discussed. A hands-on activity related to the reflecting telescope is also presented. This program is based on the concepts outlined in the National Science Education Content Standards for Earth Science: Properties of Earth Materials, Objects in the Sky, and Changes in Earth and Sky. (WRM)
